

Main model link : [Google Colab link for model code \(ResNet50_Model\)](#)

Instructions :

Open the code link clicking on the blue text above. Hope you will now be able to see the code. Mount the google drive first.

Now run the code from where all the libraries were imported.

Another tried model : [Google Colab link for model code \(InceptionV3_Model\)](#)

Instructions :

Open the code link clicking on the blue text above. Hope you will now be able to see the code. Mount the google drive first.

Now run the code from where all the libraries were imported.

Hope code works fine. Thank you.
